

Solkremtest 2009:

Full innholdsdeklarasjon for alle innkjøpte solkremer

Grønn Hverdag vurderer og rangerer produkter basert på innhold av helse- og miljøbelastende stoffer – negativstoffer. Vi deler inn negativstoffer i fire kategorier: Allergifremkallende stoffer, miljøbelastende stoffer, hormonforstyrrende stoffer og allergifremkallende stoffer.

I listene under er potensielt allergifremkallende stoffer merket med **gult**, potensielt miljøbelastende stoffer merket med **rødt**, potensielt hormonforstyrrende stoffer merket med **lilla** og spesielt problematiske stoffer merket med **brunt**. Spesielt problematiske stoffer omfatter blant annet stoffer på norske miljømyndigheters prioritetsliste, og stoffer som norske eller europeiske helsemyndigheter advarer spesielt mot. For mer informasjon om helse- og miljøbelastende stoffer i kosmetikk og pleieprodukter, se www.gronnhverdag.no/kosmetikk.

Produktene rangeres fra 1 til 6 (6 er best) etter følgende system:

Ingen negativstoffer: 6 – ANBEFALES

Parfyme, men ingen av de mest allergifremkallende parfymestoffene: 5+

Ett eller flere negativstoffer fra en av kategoriene: 5

Ett eller flere negativstoffer fra to av kategoriene: 4

Ett eller flere negativstoffer fra tre av kategoriene: 3

Spesielt problematiske stoffer: 2

Forbudte stoffer: 1 (Vi fant ingen forbudte stoffer i denne undersøkelsen)
